

Thanks so much for visiting **SimpleOrganizedLiving.com** and for downloading this free printable **Password Organizing Workbook!**

I'm confident it will help you to simplify and organize your growing list of passwords, usernames, account numbers, secret questions, and more.

You'll notice that I left each workbook completely "editable". This will make your life a lot easier because you can alter category names, input all your own data, and then save it directly to your own computer {or print it off and store it in a secure place}.

And even though I'm giving this workbook away for free -- and letting you make all your own changes, it is still copyrighted by SimpleOrganizedLiving.com. So please feel free to share it with all your friends and family, but remember to tell them where you found it!

Thanks again!

A handwritten signature in black ink that reads "Andrea". The signature is written in a cursive style with a large, looping initial 'A'.
